SUMMARY

Full-Stack Developer with 2 years shipping production Django, Flask, and FastAPI services with React front ends, including AI features in live use: RAG over pgvector, LangGraph generation pipelines, and a natural-language-to-SQL tool secured structurally rather than by prompting. Cut page loads on a live POS from 3–9 seconds to 1–20 ms.

EXPERIENCE

Full-Stack Developer

May 2025 — Present

Redlitmus Communications · India

- Built Jumbo Quiz, a Django 5 + DRF platform that turns uploaded PDF, DOCX, and spreadsheet coursework into ready question papers via a LangGraph + OpenAI pipeline with pgvector retrieval, replacing manual paper-setting.
- Built MeterSquare ERP on FastAPI and Supabase Postgres — costing, procurement, material and labour tracking, payroll, and maintenance under one nine-role approval hierarchy with value-threshold gates and row-level security.
- Delivered a real-time task and ticketing platform for telecom operations on Flask-SocketIO over gevent, with change-data-capture sync, optimistic UI with rollback, and SLA escalation that auto-classifies and freezes overdue tasks.
- Shipped that platform's AI assistant: RAG over 1536-dimension pgvector embeddings, plus a read-only natural-language-to-SQL tool secured structurally rather than by prompting — AST-level table allow-listing, user-scoped CTE shadowing, injected LIMIT caps, and query timeouts, with every call audit-logged.

Python Developer Intern

Sep 2024 — Apr 2025

Nobel Software · India

- Built practical Python and SQL foundations through hands-on training, and helped newer interns work through core concepts.

SELECTED PROJECTS

Valoryx Software — Multi-tenant Retail POS & Back-Office

valoryx.ryxtech.in

React · TypeScript · Flask · SQLAlchemy · Supabase · SQLite · Redis · Electron

- Cut page loads from 3–9 seconds to 1–20 ms — a 100×+ improvement on hot paths — by replacing per-request Supabase round-trips with a local SQLite mirror and an in-memory analytics cache.
- Built offline-first billing that keeps the counter running through internet outages and syncs to Supabase Postgres on reconnect, with multi-tenant isolation on every query, five-role permissions, and TOTP 2FA.

BigTreat — MLM Commission Platform & Media Feed

bigteam.in

React · TypeScript · Redux Toolkit · Flask · PostgreSQL · Redis · Gunicorn

- Reduced the profile page from hundreds of API calls per second to exactly one on mount by correcting a useEffect dependency defect.
- Moved the JWT blacklist to Redis for consistent logout across 64 concurrent handlers (8 Gunicorn workers × 8 threads), made reactivation race-safe with row-level locking, and tuned the deployment to ~300–500 requests/second.

Acadrix — K-12 School Management Platform

acadrix.ryxtech.in

Django 5 · DRF · React 18 · TypeScript · PostgreSQL · Redis · Celery

- Architected 13 domain-bounded Django apps over 94 multi-tenant models, exposing 140+ OpenAPI-documented REST routes across seven role-scoped dashboards.

TECHNICAL SKILLS

Languages: Python · TypeScript · JavaScript · SQL · HTML · CSS

Backend: Django · Django REST Framework · Flask · FastAPI · SQLAlchemy · Celery · Socket.IO · REST APIs · JWT · OAuth2

Frontend: React · Next.js · Vite · Redux Toolkit · TanStack Query · Tailwind CSS · Material UI

AI & Data: OpenAI API · LangChain · LangGraph · RAG · pgvector · Pandas · NumPy · Power BI · Tableau

Databases & Infrastructure: PostgreSQL · MySQL · SQLite · Redis · Supabase · Neo4j · Docker · AWS S3 · Linux · Git

EDUCATION & CERTIFICATIONS

B.E. Computer Science and Engineering — RVS College of Engineering and Technology, Coimbatore, India

2019 — 2023

Post Graduate Programme, Data Analytics & Data Science — Skill Lync, India

2023 — 2024

Certifications: Python Programming · MySQL · Power BI · Tableau · Advanced Excel
